**CUBA
100 %
RENEWABLE ENERGY**

3rd Renewable Energy and Energy Efficiency International Fair

*"An opportunity to participate
in the energy transformation of Cuba"*

Havana, september 18 - 20, 2024

Sponsored by:

Organized by:

¿What is? The Fair of Renewable Energies is the main event of the energy sector in Cuba.

Has a biennial character and constitute a suitable space to share experiences, technological advances and development programs in industries and associated entities with the energy sector, particularly those related with Renewable Sources and the Energy Efficiency.

Also, constitutes a professional platform for access to markets and the identification of new opportunities for energy investments in Cuba and other countries in the Caribbean region.

As in previous editions, will count on the participation of entrepreneurs, investors and experts, local and international, with a high professional level.

Commercial Expo

Organized for PABEXPO in association with the Commerce Chamber of Cuba, the participating companies will count on adequate areas and necessary facilities for the exposition and offers of their products and services to an ample range of professionals of the sector. Besides they will be able to carry out presentations and launchings of new products and projects, as well as develop Workshops of formation and capacitation. Areas for business meetings will be available.

Investments Forum

Coordinated by PROCUBA, it is devoted to motivate and facilitate the Foreign Investment at the Sector, updating the regulatory framework, besides the promotion and presentation of foreign investment opportunities, with priority in the energy self-sufficiency, the industrial productions and the energy services, by means of the use of biomass and solar energy. Also gives opportunities to establish alliances between national and foreign SMEs to undertake investment projects of small and medium scale.

Sustainable Energy Forum

Propitious space to increase knowledge and share experiences about Renewable Energy Sources and Energy Efficiency. In the Forum will take place:

- Conferences, in presence or virtual, imparted by high level speakers of International and Regional Organizations;
- Workshops, Panels and Roundtables, for the interchange of experiences, with experts of high academic and professional level, about public policies, front-line technologies, successful projects and other topics of interest.

Colloquium about the New Energy Transition Police of Cuba;

International Workshop: Innovative Energy Transition Finance;

Dialogue Table: Fostering Renewable Energy and Energy Efficiency in Local Development.
