DESCRIPTION OF THE COMPANY:

Leader in electroacoustic equipment, FACTEM is a French SME with 85 employees and an annual turnover of 17 million euros. Operating in the aeronautical, naval, and land sectors, both civil and military, at FACTEM we specialize in the development of cutting-edge communication equipment, particularly suited to mission-critical applications. Our product lines are designed with precision to provide clear and secure communication in high-stress environments, with a particular focus on durability and ease of use.

The company stands out for its constant innovation, supported by the latest technologies, and its complete management of the product life cycle, from design and development to industrialization, manufacturing, and maintenance in operational conditions.

DEFENCE SEGMENTS THAT ARE MOST RELEVANT FOR FACTEM:

Communication systems, communication accessories, land forces, air forces and aviation, special forces and tactical units, command and control centers, air forces and aviation.

PRODUCTS RELEVANT FOR THE DEFENCE SECTOR:

- **Heavy-Duty Speakers and Microphone Shoulder Units:** Compact, high-quality components designed for seamless integration into existing communication setups, ensuring clear voice transmission.
RSM80 : the two version of the RSM80 make it suitable for use in military (RSM80A) as well as for homeland security (RSM80W), firefighters, first responders. Currently used by the forces of the Sentinelle Operation in France to secure the Olympic games in Paris. **ALS125** : loudspeaker is designed to be installed in vehicles, shelters or command rooms in conjunction with an intercommunication system, sound broadcasting or radio. It optimized intelligibility at a low power consumption. Its compatible with various radio program (PR4G and CONTACT).
- **Rugged Radio Handsets** : two ranges of robust handsets designed for use in harsh environments, particularly military operations sites. The C2020 range is compatible with the CONTACT radio program and the S2002 range is compatible with the PR4G radio program.
- **Military-Grade Headsets** : Providing superior noise reduction and clear audio, our headsets enhance situational awareness and communication in critical operations.
- **Discreet communication systems for special forces** : **MAK** : the Mobile Audio Kit is a discreet sound system designed for quick and easy integration on board of intervention vehicles. It enables conversations to be captured and radio messages to be broadcast even at high speed
- **Other Custom Acoustic Solutions** : FACTEM also offers tailored solutions to meet specific needs in defense, developed in collaboration with end-users and industry experts.

VALUE PROPOSITION OFFERING:

- FACTEM delivers high-quality acoustic communication solutions tailored to meet the stringent demands of both military and civilian markets. FACTEM combines innovation, durability, and customization to provide cutting edge products that enhance communication efficiency, reliability, and operational effectiveness.
- Thanks to a constant investment in its R&D department, FACTEM is equipped with advanced testing and qualification tools. Our team specializes in delivering tailored solutions by adapting existing products to meet your specific requirements or by designing new solutions based on your specifications.
- Our team has the capability to develop innovative products both in-house as well as from your specifications.
