

EU-China Business Technology Cooperation Fair VIII

21-23, Oct. 2013 Chengdu, China

Sector: Bio-pharmaceutical

	Company Name	Company Profile	Cooperation Intention
1	Sichuan Chuanda West China Pharmaceutical Corporation	Sichuan Chuanda West China Pharmaceutical Corporation is mainly engaged in manufacturing management of cardiovascular drugs. The exclusive product of Lemai Granule has been sold in Japanese market for twenty years, and has been registered successfully with the Health Ministry of Canada and Vietnam, obtaining a high popularity. Production system has a number of patent protections and its core technology. Its workshop gets the national GMP certification.	We hope to establish a cooperative relationship with EU enterprises who have the marketing experience in botanical medicine or traditional Chinese medicine and to expand our overseas markets.
2	Chengdu Kanghua Biological Products Co., Ltd.		
3	Sichuan Haisco Pharmaceutical Co., Ltd.	R & D, production and sale of chemical drugs	Distribution, agency, subcontracting, R&D, technology transfer, technical cooperation.
4	Sichuan Sinew Biotechnology Co.,LTD	SINEW is an ISO 9001/2008 and ISO 13485/2003 certified privately-owned company integrating R & D, production and sale of In-Vitro-diagnostics. In Vitro Diagnostics Reagents is our main product. SINEW have a first-class standardized purification workshop and advanced production equipments. SINEW has successfully introduced a variety of antigen, antibody and other raw materials from Europe and America. At present, SINEW is actively exploring new fields, including immune detection, nucleic acid detection, gene detection and related products and technology. SINEW have cooperated with many famous overseas companies , like AXIS-SHIELD , SERAMUN , DIAZYME , BD and so on.	SINEW hopes to cooperate with the companies which focus on In-Vitro Diagnostics (IVD) and quantification of immunochromatography technology or specialize in R & D, production and Sale of antigen and antibody, with the method of research and development, technical cooperation , technology transfer and/or OEM.
5	Chengdu Easton Pharmaceutical Co.,Ltd.	Easton Pharmaceutical Co., Ltd. is built in accordance with GMP standards of EU and USA, specialized in drug research and development, manufacture and distribution of medicines. Three manufacturing bases are located in Qingbaijiang, Chengdu Hi-tech district and Meishan Economic Development Zone. Research and Development Center, and Workstation for post-doctoral are established in Chengdu Hi-tech district to facilitate Easton's drug research and development. Chengdu Mingyang Pharmaceutical Co., Ltd., a wholly-owned subsidiary of Easton, is a state-of-the-art pharmaceutical company specialized in manufacturing active pharmaceutical ingredients (APIs) and their intermediates, supplying APIs domestically and globally.	Sales (APIs) : Fosaprepitant , Moxifloxacin hydrochloride , Flupirtine maleate , Esomeprazole Clopidogrel Hydrogen Sulfate , Bisoprolol Fumarate Olanzapine , Fasudil Hydrochloride Ubenimex.

6	Asta Tech (Chengdu) Pharmaceutical Company, LTD	<p>AstaTech Pharm is certified as Hi-Tech companies. With over two thousands products in stock, we'd like to provide our Catalog Products and other services such as CMO, OEM, CRO, FTE and Process Development to our customers in Pharma/Biotech as well as in Chemical Industries in the world. Advanced facilities: Corning Advanced Flow Reactor, Low temperature reaction kettle (-100℃), high temperature reaction kettle(300℃), high pressure reaction kettle, film evaporator, low temperature vacuum drying oven; Main export products: (R)-Piperidin-3-amine dihydrochloride , 5-Fluorocytosine。</p>	<p>We would like to meet with Euro companies focusing on the field as follows:</p> <ol style="list-style-type: none"> 1. Green Chemical 2. Chemical Process Technology 3. Facility Process Technology 4. Polymer Monomer
7	Chengdu Pharmaceutical Disinfection Co., Ltd.	<p>Already ISO9001 & ISO14001 passed, Rosun is a professional researcher and manufacturer of eco-friendly personal hygiene and disinfectant products Since 2002, products mainly include Mouthwash, Skin and Hand Sanitizer, Toilet Seat Sanitizer, Water treatment Disinfectant Series(for drinking water and sewage water), Disinfectant powder for air and surface, etc.</p> <p>Now we are exporting our products mainly to Asian and African countries including Thailand, Pakistan, Malaysia, Philippines, Morocco, etc.</p> <p>We are expecting to cooperate with some European companies and to promote our products and eco-friendly idea to the market.</p>	<p>Hope to have a negotiation with enterprises of personal hygiene and disinfectant products, including mouthwash, skin and hand sanitizer, toilet seat sanitizer, environment disinfectant, water disinfectant. For the way of cooperation, sales agency is preferred.</p>
8	CHENGDU XINJI BIOACTIVE COLLAGEN DEVELOPING CO.LTD	<p>hengdu Xinji Bioactive Collagen Developing Co. LTD is a hi-tech biotechnology company, which was set up in 2005 and devotes itself to developing the bioactive collagen liquid which is closely bound up to the people's daily life. With the technology supported by Sichuan University, the company recently develops a new kind of pure bioactive collagen liquid as cosmetics (type I) , whose preparative technology has obtained the national inventing patent. This product was originally prepared in the laboratory by Dr. Li repeatedly doing experiment, for what a national patent was given in August 2004. And it filled the blank in this field of our country. It is put into industrial production in September 2005 by Chengdu Xinji Bioactive Collagen Developing Co.Ltd. Based on the productive practice and the innovation of technology, we worked out the solution of the producing process and its necessary equipment. In March 2006 the first batch of products leaving the factory successfully passed the enterprise quality examination and announced the success of mass production.</p> <p>The product is from the health of fresh donkey skin that underwent a rigorous inspection and quarantine, after</p>	<p>We hope to negotiate with those European companies which study and use the biomedical materials (biological activity of low-antigenic collagen (type I) or engage in professional venture capital management .</p> <p>We hope to set up a joint venture of which the European partner is responsible for getting the patent, license, certification as well as sales, and giving us guidance of the import and export trades. And we are responsible for the R&D, production and domestic marketing of biological activity of low-antigenic collagen (type I), as well as technical services(the development of drugs for external use).</p>

9	Sichuan Fuzheng Pharmaceutical Co.,Ltd.	Breeding research and GAP standard planting of seeds and seedlings of Chinese traditional medicines (such as rhodiola crenulata, Sichuan safflower, radix curcuma, Emei hemsleya amabilis, buckwheat pollen, gymnadenia conopsea, fructus arctii and rhizoma polygonati, etc.); Sichuan-Tibet genuine special small-package pieces of traditional Chinese medicines (including bulbus fritillariae cirrhosae, buckwheat pollen, fermented red rice, potentilla anserine, angelica apaensis, radix curcuma, penthorum chinense pursh, lamiophlomis rotata, ganoderma spores, hedysarum polybotrys, epimedium wushanense, vine of multiflower knotweed, artist's conk, saussurea involucrate, erigeron breviscapus, Emei hemsleya amabilis, medicated leaven, semen holarrhenae, rhizoma fagopyri dibotryis, rhodiola crenulata and gymnadenia conopsea); healthy pieces of Chinese traditional medicines: supplementary pieces (including penthorum chinense pursh, rhodiola rosea, epimedium, safflower and fermented red rice); and management and service promotion of modern marketing system (including electronic commerce network).	<ol style="list-style-type: none"> 1、 Seeking for cooperative partners on research of the breeding of seeds and seedlings of herbal medicines (Chinese traditional medicines) (including the domestication of wild medicinal materials on the Qinghai-Tibet Plateau); 2、 Seeking cooperative enterprises and projects for standard planting and intensive processing of Chinese herbal medicines (health-care products and medicine) ; 3、 Seeking market partners in European for promotion of Chinese herbal health-care products and food; 4、 Seeking for project shareholding investment and project financing cooperation; 5、 Seeking for cooperation of Europe projects in Chinese markets.
10	Sichuan TIANLIAN Pharmaceutical Co. Ltd.	Established in 2012, Sichuan TIANLIAN Pharmaceutical Co. Ltd. is company integrating development, manufacture, and sales of medicines as a whole. The company specializes in pharmaceutical R & D, combining the research resources of Sichuan University Huaxi Medical College and Chengdu University of Traditional Chinese Medicine, and has the independent research and development of a number of natural plant prescription drugs, a number of patents for Chinese traditional medicine.	Import and export trade.

11	HitGen Ltd	<p>HitGen Ltd is a life science company based in Chengdu, China. The company was founded by a group with extensive scientific and managerial experience in pharmaceutical, CRO and related industries. The formation of the company has received major investment from China Chengdu Import and Export Group Co. Ltd, and enterprise grant support from Chengdu High Tech Zone.</p> <p>We are an innovation-driven and customer-focused company. HitGen has established a unique platform for early phase of drug discovery research.</p> <p>With a focus on hit identification and lead generation during the early drug discovery R&D, HitGen aims to be a leading provider in progressing projects from targets to leads stage. To this end HitGen has established a core platform consisting of high quality, large DNA encoded compound libraries and research capabilities in protein expression and purification, in-vitro screening and affinity selection, chemical library design and synthesis, and medicinal chemistry.</p> <p>HitGen also provides other biological reagents and services to support drug discovery research.</p>	<p>1. Novel scaffolds for drug discovery: Firstly, we'd like to buy some unique structures from commercial source if they are already on catalogues. Secondly, we have got some ideas on the structure design and we may outsource some of the synthesis work. Thirdly, if there are really interesting scaffolds, we are willing to co-develop some encoded libraries with our building block collection (more than 4,000 reagents) as well.</p> <p>2. Phenotypic equivalent target fishing, Cooperation Mode: echnology transfer.</p> <p>3.DNA encoded compound library construction and screening for novel drug candidate identification, Cooperation Mode: technology transfer or technology service</p> <p>4. Custom organic synthesis and biological services, Cooperation Mode: technology service</p>
12	Chengdu Rich Science Industry Co., Ltd.	<p>After 14 years' rapid development, CDRICH has been a world-renowned professional service provider of Specimen Collection System! CDRICH has two production bases, occupying a total area of 30 thousand square meters.</p> <p>CDRICH has accessed ISO9001:2000, ISO13485:2003 in January, 2004 and has CE approved in April, 2005.</p> <p>With strong R&D capability, CDRICH has won more than 20 patents and over 30 proprietary technologies.</p> <p>Moreover, CDRICH is one of Chinese Ministry of Health support enterprises for sample collection standardization technology. CDRICH professionally provide our customers with Vacuum Blood Collection System, Stool and Urine Specimen Collection System, Microbe and Cell Culturing and Verification System, Biotechnology, Laboratory Apparatus, Laboratory Reagents etc., and our products have been exported in large volume more than 50 countries and regions.</p>	<p>The company hopes to look for partners which are engaged in IVD(in vitro diagnosis), and prevention and cure of diseases and other fields of biological medicine with core competitiveness and with a good reputation of the partnership,</p> <p>Cooperation modes: patent transfer, technical cooperation, production, agency, joint venture shares, setting up production base.</p>
13	Chengdu Origissay Diagnostic,ltd.	<p>Origissay adopts the world-leading manufacturing equipment and test equipment and strict quality management and fine division of labor to commit to set the research and development, production and sales of clinical in vitro diagnostic products as one.</p>	<p>We want to cooperate with European enterprises for product development, import and export trade, and technical cooperation.</p>

EU-China Business Technology Cooperation Fair VIII

21-23, Oct. 2013 Chengdu, China

Sector: Bio-pharmaceutical

15	Chengdu Organochem Co.,Ltd.	With its rich-experienced scientific talents, Chengdu Organochem develops high-value drug intermediates and active pharmaceutical ingredients, such as 2-thienylethanol, 2-thienylethylamine, 4, 5, 6, 7-tetrahydrothieno[2,3-c]pyridine, clopidogrel, ect. Our products are mainly exported to overseas markets.	Jointly production and sale of active pharmaceutical ingredient of Clopidogrel and its intermediates.
16	Sichuan Yuanda Shuyang Pharmaceutical Co., LTD	Our company focuses on the production of blood products. Our products include human albumin, human immunoglobulin, tetanus immunoglobulin, rabies immune globulin and hepatitis B immunoglobulin, histamine immunoglobulin, human immunoglobulin for intravenous injection (pH4), hepatitis B immunoglobulin (pH4) for intravenous injection. The ethanol process at a low temperature and pressure filtration and chromatographic techniques are used in our production process. Immunoglobulin (pH4) and other products are exported to India, Turkey, Russia and other countries. At present, our company is working with European countries for new plant construction and technology introduction.	Hope to cooperate with: Blood products company Technology consulting company Company for Pharmaceutical production, design and construction Company for filtration, chromatography and membrane filtration technology
17	Sichuan Shuanglu Medical Apparatus & Instruments Co., Ltd.	The company has past ISO9001 and ISO13485 in 2002, CE Marking in 2008 and was regarded as Hi-Tech Enterprise in 2009. The company majors in R & D and production of single use sterile medical devices. The main products include disposable sterile syringe with needle, disposable infusion set with needle, disposable infusion set with bag and needle, disposable leucocyte proof blood transfusion sets, disposable machine-collected blood-cell separator with attached blood bag, disposable container for venous blood specimen collection.	To cooperate with companies or research institutions of R & D of medical devices in technical cooperation, subcontracting, patent licensing, technology transfer.
