

EU-China Business Technology Cooperation Fair VIII

21-23, Oct. 2013 Chengdu, China

Sector: Environmental Protection

	Company Name	Company Profile	Cooperation Intention
1	Chengkan Project Co., Ltd.	Our activities are mainly for environmental appraisals which include the appraisal of mine, real estate, industry, industrial park, etc. and engineering projects. The engineering projects are for solid-waste treatment, sewage, sewage mud treatment. There are still some other engineering projects under negotiation.	We need co-operator who owns their technologies and products in new energy & environmental protection field. We adopt the cooperation form of distribution, sales agent, technologies transfer & co-operation, etc. We also want to find company which can provide technology support or which has BOT project experience.
2	Chengdu Zhengguang Eco-Technology Co., Ltd.	Chengdu Zhengguang Eco-Technology Co., Ltd. (hereinafter referred as "ZG") is the important high-new technology enterprise under the state Torch Plan. ZG undertakes several major scientific projects such as "research of a number of the State strategic emerging industry development", "major the State 863 Plan", "the State Significant Program for Tackling Key Problems", "the demonstration project of the State applying high technology to production". ZG owns eleven proprietary intellectual property rights and state invention patents including "new ways of multiple treating sand by collocating root system with ecological checks" and "the processing way of biological bacterial fertilizer". ZG specializes in researching, producing, and marketing organic (nanometer, microbe) fertilizer, biomass energy planting, sand and desertification treatment demonstration project and construction.	We expect to discuss with the companies in the field of biotechnology and nanometer technology. Through mutual understanding, it is expected to cooperate with the European companies in the field of research and production to supply the most advanced technology and products for improving quality of the polluted soil, treating sand and desertification control.
3	Chengdu Honhua Environmental Technology CO., LTD	Chengdu Honhua Environmental Technology Co., Ltd. focuses on environmental protection treatment solution of heavy metal wastewater, and on the R&D, design, production, sales and installation of equipment as well as services. Besides, the company provides the solution of recycling heavy metal wastewater and operation services for the industries in PCB printed circuit board, non-ferrous metallurgy and electroplating. The company mainly provides the environmental protection equipment used in the recovery system of noble metals (such as golden, silver, copper and nickel), the recycling system of acid etching liquid, the treatment system of low-copper wastewater, the recycling system of etching liquid, the recycling system of extracting copper from grinding plate water, and the treatment system of acid-base organic waste gas. At present, based on the closed type self circulation and parallel type non-destructive separation technology, the copper ions of wastewater containing copper of PCB-production enterprises can be reduced to highly purified electrolytic copper plates. The technology can bring clients environmental and economic efficiency.	Focused industries: PCB and non-ferrous metallurgy Focused technologies: Technical exchange of the cleaner production, circular treatment and resource recycling of heavy metal waste water industry.

Sector: Environmental Protection

4	Jiaoda Engineering Co., Ltd.	Jiaoda Engineering (JE), established in 2000, develops businesses mainly in wastewater treatment (including utilization and disposal of sludge), noise control, import of environmental equipments, marketing assistance for foreign partners.	Cooperation in projects in wastewater treatment facilities (including disposal of sludge, especially in anaerobic digestion and pyrolysis with other wastes), repairing and restoration of contaminated soils, disposal of kitchen wastes, biogas using agricultural wastes, license-based marketing, local support for foreign partner, joint activities in introducing new products and technologies.
5	Sichuan MingRiDe Environmental Protection Technology Co.,Ltd	Waste management Water treatment Scientific research Devise, Production, Sales Project contracting Register capital:10 million RMB, 7 patents in USA, Singapore, Taiwan China and PCT Projects on run:“WST” full automatic city solid waste management system, reuse of recycling water in wastewater treatment system, Biogas recycle system, reprocessed plastic production system, Bio deodorization, Bio organic fertilizer production system and RDF fuel production system.	Looking for solid waste management and wastewater treatment company or research center. Cooperation intention : 1. Technology Transfer 2. Collaboration in R&D and Marketing 3. Technology investment, joint venture
6	SICHUAN DKT ENERGY TECHNOLOGY CO.LTD.	A Sino-foreign joint venture with equity participation by SBCVC; A high-tech enterprise integrates research with design and engineering, specializing in gas separation and purification and in utilization of industrial waste gases. The company has a R&D center and a special adsorbent production plant and holds a leading role in a variety of technologies at home and abroad.	Technologies of concentration of methane from low concentration coal mine gas, olefins production from coal and traditional PSA & TSA adsorption.
7	Sichuan Asia Pacific Environment Engineering Co.,Ltd	Sichuan Asia-Pacific Environmental Engineering Co. Ltd. consists of a Research Institute (Sichuan Asia-Pacific water treatment engineering design technology) and three separate companies (Sichuan Asia-Pacific Environmental Engineering Co. Ltd., the Asia-Pacific Environmental Protection Technology Co., Ltd., Sichuan Asia-Pacific Chemical Co. Ltd.). Relying on the study of the industrial waste water and city sewage treatment technology and pharmaceutical research, it undertakes the engineering design of the domestic sewage treatment project which aims for amplification and provides water treatment technology and complete sets of equipment. It is a company dealing with city wastewater, petrochemical processing, military industrial wastewater treatment, paper printing and dyeing wastewater treatment, engineering design and the technology of professional wastewater treatment. The company has got three national "invention patent" of sewage treatment technology and FGD technology.	Co-operation Type: Offered: Research co-operation Offered: Technical co-operation Offered: License agreement Offered: Manufacturing agreement Offered: Sales / Distribution Offered: Investment/Financing Offered: IPR Know-How Offered: Market Access China Offered: Import / Distribution

8	Sichuan Zhongguang Lightning Protection Technologies Co.,Ltd.	<p>Zhongguang Hi-Tech is founded in 1987 by Professor Wang Deyan, a well-known expert who devotes himself to the development of national lightning protection industry. Through over 20 years' hard work and efforts, the company has developed from a small company into a leading company of lightening protection industry in china and a famous international enterprise in the field.</p> <p>As a "high-tech" and "high-growth" enterprise, Zhongguang lightning protection has been mainly involved in "lightning protection" and "electromagnetic protection".</p>	<p>Devoted in lightning protection products, applications, solutions, technology and testing, we look for national and regional strategic cooperation, and hope to become a qualified supplier and a sales agent of our products in different regions and countries in the agent. And we also seek for industry project cooperation (such as communication, electric power, energy, transportation, clean energy, construction, etc.)</p>
9	Sichuan Demo-Scimee Sci.&Tech. Co.,Ltd	<p>DEMO-SCIMEE is a comprehensive wastewater treatment provider in R&D, design, manufacture, project delivery and operation. We dedicate in development and application of permanent magnetic separation water treatment. Currently, we have owned more than 70 patents and have been qualified with ISO9001:2000. As three major water treatment technologies and equipments of our company, ReCoMag, ReMagdisc and MagBr have been applied widely in metallurgy wastewater treatment, coal mine water treatment, municipal sewage treatment, oil field wastewater and so forth. China is our main market, where over 280 projects are now in operation. We have set up cooperative relationship with enterprises and governments from Australia, France, Austria, Japan, USA, Israel and so on.</p>	<p>My company hopes to have a negotiation with the EU environmental protection enterprises in the areas of joint venture, production, technology transfer, technical cooperation, such as:</p> <ol style="list-style-type: none"> 1. EU companies engaged in the field of environmental protection sewage treatment 2. EU companies in land restoration and sludge treatment 3. EU companies with advanced treatment technology and equipment in the field of air pollution control.

10	Beijing TDR Environ-Tech. Co., Ltd.	<p>Established in 2002, Beijing TDR Environ-tech Co., Ltd (TDR) is an environmental protection company with advanced technologies, specializing in leachate treatment and manufacture of Disk-tube leachate treatment facilities. As the first established leachate treatment company in China, TDR is a national leader in this field. TDR is proficient in following leachate treatment technologies: anaerobism, aerobic, MBR, MF, UF, DTNF, DTRO. According to the different raw water in different areas and different permit water quantity, TDR provides the most suitable leachate treatment plants. With its own water treatment technologies, TDR is dedicated to the treatment of heavily polluted waste water via membrane technologies, and extends its business to zero concentrate discharge, high concentration industrial waste water treatment and mobile emergency water supply facility.</p> <p>In 2012, TDR incorporate with the new shareholder, Interchina Water Treatment Co., LTD, to explore new fields and create new strengths.</p>	<p>Looking for Strategic Cooperation, joint venture and technology agency. We hope to be a strategic partner or agent of water company or membrane company.</p>
11	Chengdu Pengjing Environmental Protection Co., Ltd.	<p>Chengdu Pengjing environmental protection technology co., LTD is engaged in equipments design, development, production, and the development of all kinds of water treatment chemicals and environmental protection projects.</p>	<p>Business Request: (1) to learn advanced technology of solid waste control; (2) to popularize and promote the application of foreign environmental technology in China; (3) scientific research on environmental protection.</p>
12	Leshan luyuan forestry Co., Ltd	<p>Leshan luyuan forestry co., LTD, engaged in the nursery stock cultivation, wood processing, Chinese herbal medicine planting and selling, has been known as "leading enterprise of agricultural industrialization in Sichuan province".</p>	<p>Looking for cooperative partnership in developing "50,000 mu fast-growing forestry development project in YueXi county ", and we hope to have some talks with related EU enterprises on the forestry investment projects.</p>
13	ZM Environmental Protection Group	<p>Our company is an ecological science and technology enterprise engaged in hazardous waste disposal, recycle and reuse of recyclable resources and agricultural development.</p>	<p>Know-How Offer: Sci-Tech Park Project of Agriculture</p>

14	CER Group	<p>The CER Group is a diversified high-tech enterprise invested by Chengdu Haitian Group and China Environmental Energy Group, committing to environmental protection, research of energy resources, investment, construction, operation, eco-tourism real estate.</p> <p>So far, we have more than thirty wholly-owned subsidiaries or joint ventures in Sichuan and other provinces in China and abroad, and actively do businesses with Vietnam, Malaysia, Cambodia and so on. In the coming years, we intend to invest \$5 billion in the use of international advanced technology for construction and operation of waste incineration power, biomass energy, green water, wind power, solar photovoltaic power as well as eco-tourism real estate.</p> <p>The CER Group consists of many excellent members such as masters, Ph.D, researchers and professors, who excels in management and technology with the honors of the National Outstanding Environmental Entrepreneur and Evaluation Expert of State Torch Program etc.</p> <p>Our business is carried out with our adherence to the ideas of ecological civilization, energy conservation and</p>	<p>Within five years, we plan to invest \$3 billion on BOT projects of solid waste incineration power plant, water supply, water treatment, wind power plant, solar photovoltaic power plant.</p> <p>The ways of cooperation include patent, technical cooperation, manufacture, joint venture and so on.</p> <p>At present, 2000 cities and towns in China generate great demand to waste recycling techniques which can process 100-200 tons of solid waster per day. And we have a market of \$35 billion with high ROI (return on investment).</p>
