Generally, we have the R&D capability including C /C#/C++，PHP，ASP.NET，MYSQL，MSSQL，Oracle，JAVA，JSP，and JavaScript to support our vertical outsourcing services. Our services include: Web Application/Desktop Application/Database Design/ Function Testing and Stress Testing/ Specification Fulfillment/Test Case Specification	
4	CHENGDU FINCHOS ELECTRONICS CO.,LTD.	Chengdu FINCHOS electronics co.,LTD. is committed to application-specific integrated circuit design which is used in biological identification, providing biometric chips and fingerprint sensors, including the photoelectric sensors and sliding type fingerprint sensors. FINCHOS is a Fabless IC design company, providing product application solutions and technical supports. The company has got the IC design enterprise certification of the ministry and the ISO9001 quality management system certification. We use the general EDA tools and FPGA design and validation.	1.Research 2.Patent 3.Technology transfer 4.Technological cooperation

Sector: ICT

5	成都四象联创科技有限公司	Located in Chengdu Gaoxin technology development zone of Sichuan province, Chengdu four images Linkage Technology Co. is a High-Tech enterprise specializing in R&D of enterprise computer application software, data analysis, information-based safety service in high technique field. Our company has been longly focused on the production of enterprise information-based software, construction of information platform, large-scale data analysis and saving, enterprise information-based safety service and so on. Up to now, we have successfully made in-depth cooperation on software with 13 provincial enterprises, and meanwhile, our independently-developed software products have already cooperated with 1700 enterprises at home. And we will continue to go forward!	The software cooperation, the oversea marketing and branches set-up
6	Chengdu Vantron Technology,Ltd.	Vantron Technology was established in Chengdu Hi-tech Zone in 2002. With its headquarters in Chengdu, Sichuan, China, and it has branch offices in the United States of America and East China. Vantron technology has got certification of ISO9000 and has a strong background in basic technology research. With an internationally advanced level of embedded hardware and software R & D team, Vantron is also the embedded partner of Intel & Microsoft. Vantron provides embedded products including embedded boards, M2M gateway, HMI, Digital Signage etc. And our products cover ARM platform, X86 platform and embedded multimedia platform. We also provide professional OEM/ODM services. Our professional project management, efficient and correct development technology, strong technical foundations, full mobilization of human resources and on-time delivery are all ensuring the success of our customer project development. Vantron technology has customers including global top 500 enterprises in the world and major enterprises at home, including GE, Medtronic, Siemens, Johnson & Johnson, LifeFitness, Singapore Technologies, Singapore metro, CIOMP, CRTC-10 and other large enterprises. Vantron technology are committed to become the interna	

Sector: ICT

7	CHENGDU YULE TECH CO.LTD	The development of computer network technology, research and development of computer hardware and software; software technology consulting, computer information technology consulting, computer system integration, enterprise management consulting, design, production, agency, advertising (except for balloon advertisement), exhibition services.	
8	Chengdu Junsheng LLC	Research and development on mobile health technology.	Research and development on mobile health technology,distribution, agency,subcontracting and so on.

Sector: ICT

9	Chengdu New Edge Technology Co. Ltd.	Chengdu New Edge Technology Co. Ltd is a leading company in intelligent video processing products. We have a research center located in Chengdu with tens of R&D personnels graduating from world-renowned universities. And they are responsible for research and identification of detection and tracking algorithms as well as retrieval algorithm. Under the guidance of this core technology team, we independently researched and developed the intelligent video tracking identification products. And our products can be applied to national key security establishments such as public security nets, ITS, banks and airports, etc.	Looking for cooperation opportunities with solution provider in video surveillance field and excellent team in computer vision pattern recognization
10	ChengDian Electronic&Information Technology Engineering Co.,Ltd.,Chengdu	The main products of our company include ultrasonic anemometer, LTCC series products, microwave and millimeter wave components, etc. Our production facilities include KEKO series, U.S. BLVEM company, etc.	We hope to negotiate with the European enterprises which engage in meteorological instruments, wind power, etc. We also want to cooperate with the companies that are engaged in agency, distribution, import and export trading.

Sector: ICT

11	SC GAOXING SCI&TECH DEVELOPMENT CO.,LTD	Sichuan GO THING TECH, located in National Information Security Industry Base, is a leading enterprise in R&D, sales and security integration for the physical security of computer information system and network security products since its establishment in 1996. The series of security products independently developed by our company have obtained many national accreditations. Our customers are We have customers all over China and all of our products have gained a good reputation in the market.	
12	IPGoal Microelectronics (Sichuan) Co., Ltd		
13	CHIEFAN(CHENGDU) TECHNOLOGY DEVELOPMENT CO .,LTD	Chiefan (Chengdu) technology development Co.,Ltd is a high-tech enterprise which provides at the core of the solution of security and all-in-one card. The main products of Chiefan include Car Park equipment, Channel Gateway equipment, Access equipment, Elevator Control equipment, etc. 　　After more than ten years of development, the company has found Sichuan sub-centers, Chongqing sub-center, Shandong sub-centers, Yunnan sub-centers, Shanxi sub-centers, to establish a national radiation network based in the Southwest of China. 　　The company has always focused on products R & D and innovation. Under the leading of more than 20 masters and senior staff team, the company has gained 30 professional certificates (and other 10 patent applications have been formally accepted), 6 Software Copyright certificates, High-tech Enterprise certificate, ISO9001:2008 Quality Management System certification and the honor certificate of the 2011 and 2012 Annual Chengdu Security Industry Top 10 Brands, etc. 　　As for our exports, the company always has dedicated to the cooperation with the international partner	We hope that we are lucky enough to find a company who wishes to cooperate comprehensively with our Channel Gateway product through the EU B&T Cooperation Fair(distribution, agents, import and export trade). Our channel gate is divided into civil and commercial products: commercial products include 1600U series, 1600F series, and 1400S series; Civil products include 1600I series. And our products are competitive and widely used in the domestic market, and we also welcome our partner's visit.

Sector: ICT

14	chengdu zhong he yun sheng technology co.,ltd		Our company successfully researched and developed the intelligent video analysis system. We mainly take the cooperation modes of joint venture and agency.
15	CHENGDU JR ITO-BPO CO., LTD.	The company successively has launched the IT operation outsourcing service, software development outsourcing service, IT maintenance outsourcing service, telephone marketing outsourcing service and customer service outsourcing service. The company recently launched the electronic commerce business process, covering seven services：outsourcing service, shop decoration, store maintenance, to train promotion, network promotion, APP outsourcing, product shooting. The company has passed ISO20000 and ISO27001 certification.	We hope to have some communication and cooperation with European enterprises in business process operation services（BPO）.
16	X-Creative Co.,Ltd	Our company's main business is now providing delivery service of senior fresh ingredients as well as health care food for the Chengdu Area. For technical use, our application software has adopted the "scenario-based personalized mobile recommendation technology" and "big data analysis based on business intelligence technology," which enables us to be at the domestic leading level of technology. Currently, we have no experience in foreign cooperation.	The company hopes to have a negotiation with the EU companies who engage in snacks, beauty food, health care food and other food companies (such as: London Chamber of Commerce), and the ways of cooperation can be distribution, agency and so on.
17	Chengdu Simutech Science & Technology Development Co.,Ltd.	Main products: Intelligent Engineering; 4D Grid locating system; high-accuracy locating system Main services: Development and sales of software and hardware, technical service supply; cargo import and export. Certification: ISO Main import and export destinations: France and Japan Foreign cooperation experience: We have cooperated with Dassault Systemes since 2005 on the application of 3D design in hydropower industry.	We would like to cooperate with enterprises engaged in the service of IOT, cloud computing and 3D collaborative design. Cooperation methods: Agent, R&D, technical cooperation, technology transfer

Sector: ICT

18	Rose Datasystems Inc.	ROSE Datasystem, a professional solutions and services provider of high-end, non-stop data redundancy and disaster recovery system for enterprises. Our products include RoseHA, RoseHA(multi-node), RoseMirrorHA, RoseReplicator, RoseDR, and RoseDataback, which are applied and promoted in the major markets in China, States, Germany, Japan, Korea, Taiwan, HK, South East Asia and Africa.	Looking for partnership with experienced domain experts in Europe for marketing, or cooperation in technology development for non-stop data redundancy and disaster recovery system.
19	Marigold Software Engineering Inc.	Founded in 2008, focusing on the domain of Smartphone software, we are an outsourcing service provider of professional Smartphone testing and software app development. The testing platforms cover Android，WPhone7/8，Brew, and the testing services include Smartphone device, chipset, OS as well as applications. We have set up partnership with US and Taiwan Smartphone OEM and chipset providers. And relevant operators include CMCC，China Unicom，China Telecom，AT&T，Sprint，VZW，Vodafone and Orange.	Looking for business opportunities from carriers, Smartphone manufacturers, communication chipset providers, Smartphone software/hardware platform developers and application developers to provide Smartphone testing and software development outsource service.
20	sichuan province q-tech information co.ltd	Sichuan Qingqi Information Technology Co.,Ltd was set up in December 2009. It developed the Unified Communications platform software at the begining. It provides many high-tech solutions for customers, such as water environment online monitoring, water supply and drainage pipe network monitoring, water rainfall regime monitoring, small and medium-sized reservoir comprehensive information system, and advanced instruments and equipment needed for environment monitoring . In 2011, the company won the title of Sichuan Province High-tech Software Enterprises. It owns several copyrights and certifications of software product, such as the certification of the surface/groundwater quality automatic online monitoring system, environmental quality management information system for the Internet of things, pollution sources on-line monitoring system, water supply and drainage pipe network intelligent information processing system. Now it devotes to be one of the best 'water resources security' professional high-tech companies in China.	Sales and distribution of system in Hydrology and water quality

Sector: ICT

21	Sichuan Zbon System Integration Co., Ltd	Our products and services mainly include intelligent building system integration, computer network system integration, security system integration and industry information solution integration.	We hope to cooperate with enterprises of security products as well as the IOT industry enterprises in the production or distribution agent.
