ISRAEL HEALTHCARE CYBERSECURITY SUMMIT (IHCS)

Monday, June 26th, Tel Aviv University

The frequency, sophistication and severity of ransomware attacks on healthcare providers have increased dramatically over the past several years, with COVID-19 only adding to this trend.

However, there is a lot that can be done by healthcare organizations, government agencies and cybersecurity providers in order to improve resilience, prepare for potential attacks, and respond and recover when they occur.

Cyber Week 2023 , Israel Ministry of Health and the **Israel National Cyber Directorate** are excited to dedicate a special event to this important topic, with leading experts from all over the world.

Join us on June 26th, 2023.
