# INTELLIGENT TRANSPORTATION SYSTEMS CYBERSECURITY SUMMIT

Thursday, June 29th, Tel Aviv University

In recent years, all types of transportation, on land, air and sea have undergone a significant technological revolution, becoming more connected and autonomous. These changes improve user-experience, efficiency and performance, but at the same time expose transportation systems to malicious cyber-attacks.

Manufacturers, suppliers, system integrators, vehicle fleet operators, government authorities, and other stakeholders in the transportation domain, must make sure that their products and systems are cyber-safe.

During **Cyber Week 2023**, the **Israel National Cyber Directorate**, **Israel Ministry of Transportation** and **CyITS** Israel's National Cyber Security Research & Testing Institute for Intelligent Transportation Systems – will hold an event focused on Intelligent Transportation Systems Cybersecurity.

Join us on June 29, 2023 in Tel-Aviv!

**Cyber Israel**  
National Cyber Directorate

**CyITS**  
מרכז היסודות הלאומיים  
לחסינות המערכת  
Israel Cyber Center  
for Intelligent  
Transportation System
