

## **CV - Kristofer Nevall**

Kristofer Nevall is civilian analyst seconded to DCDC from the Swedish Armed Forces.

Before joining the Futures team at DCDC he was a Deputy Research Director at the Swedish Defence Research Agency (FOI).

His career at FOI started in 2012 where he spent the majority of his time as an operations analyst in different positions at the Swedish Armed Forces HQ – including Joint level operations planning and capability studies for C4ISR.

In addition to his time as an operations analyst he spent three years at the department for Space Systems focusing on Space Domain Awareness and Horizon Scanning.

Kristofer is a space engineer by training and has a PhD in Atmospheric Physics from the Max Planck Institute Solar System Research in Göttingen, Germany.
