On 19th May 2015 an event International Engineering Cooperation Day 2015 is being organized by the SARIO (Slovak Investment and Trade Development Agency) in Nitra, Slovakia.

Engineering 2015 is an official accompanying event to the 22nd International Engineering Trade Fair, held on 19–22 May 2015 in Nitra, Slovakia.

The B2B event is targeted to organizations/corporations offering or looking for new technologies, innovative tools and modern solutions for their products, services, further development and manufacturing processes, as well as the commercial activities in the field of engineering industry and closely related industries.

This year the program will feature an important addition — the accompanying event "Sourcing Day" offering the unique opportunity for Slovak companies to become a part of subcontracting chain of an outstanding international company.

- present your innovative ideas in engineering and call the attention of potential European cooperation partners
- meet numerous prospective cooperation partners in a single day — reduce the amount of time and money for finding new partners
- take advantage of the progressive presentation of your company and B2B negotiations in one place
