Dear Sir or Madam,

We are witnessing with great pleasure that economic relations between Turkey and Slovenia is gaining momentum and the interest of the businessmen are increasing.

In this context, I would like to inform you about a recent development about formation of Turkish constructors' and subcontractors' database.

This web site owned by a Turkish company which is subject to private law.

Their database provides Turkish Subcontractor Companies information for construction projects in Turkey and the Middle East.

At the moment, the database shows about 2700 contracting companies. Interested parties can match their requirements to the desirable and suitable Turkish Business Partners in Construction field through this useful website which can be reached via this link: [www.subconbank.com](http://www.subconbank.com)

We hope that this data bank leads Slovenian companies to create business opportunities in cooperation with Turkish Constructors.

Kind Regards,

**Gamze Doğan**
