

Exhibitor

**tl transport**  
logistic

**2021: online only**

I am very sorry that I have to inform you today that transport logistic 2021 will not take place as a presence trade fair. The decision for the postponement was made by Messe München in close consultation with the transport logistic Exhibitor Advisory Board, in which numerous companies and associations of the logistics industry are represented. The background to the decision are the extensive international travel restrictions, the lifting of which is not foreseeable until early summer and which threaten the success of the trade fair participation.

As a bridge to the upcoming events in the transport logistic network in China, in the USA, in South Africa, in Turkey and in India, a transport logistic online event will be realized from May 4 to 6, 2021. We will publish further information on this in due course.

The next transport logistic as a physical trade fair will take place in Munich from May 9 to 12, 2023.

We look forward to welcoming you at transport logistic Online from May 4 to 6, 2021, and very much hope that physical meetings in the usual atmosphere will be possible again in a timely manner. Until then, please stay healthy.

With kind regards

Yours Caroline Thiemt
