The professionals of BALÁZS & KOVÁTSITS Legal Partnership have widespread experience in business law and civil law and in many other special legal fields. We provide our services in English, German, Russian, Ukrainian, Italian, Spanish, French besides Hungarian. We serve our clients with complex services in special fields and also with special services which require complex and widespread knowledge, expertise and experience. We regularly represent clients from different European, CIS countries and other states. Further to the most usual types of affairs in business law (issues related to corporate law, real estate law, commercial law, labour law) our legal partnership is specialised and has significant experience in construction law, M & A transactions, compliance, data protection, intellectual property law, energy law, environmental law, public procurement law, litigation and arbitration. In co-operation with outside advisors, we are able to offer complex services in our clients’ business operations, including investment and financial counseling, tax advice, book-keeping, auditing and real property management. Our legal partnership is the founding member of the international legal association EAST LEGAL TEAM EEIG. The objective of this association is to provide legal services through local, national law firms that are aware of the local law, legal culture and language of their countries in Central-East-Europe and in South-East-Europe on high level for companies willing to invest in the region.

Areas of Activity

- Renewable energy

Cooperation Profiles

Offer: Legal services in field of the business law in eight languages in Hungary and in Central-East Europe

Further to most usual types of affairs in business law (issues related to corporate law, real estate law, commercial law, labour law) our legal partnership is specialised and has significant experience in construction law, M & A transactions, joint ventures, intellectual property law, compliance, data protection law, energy law, environmental law, public procurement law, litigation and arbitration. We provide our services in English, German, Russian, Ukrainian, Italian, Spanish, French besides Hungarian.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES

25 years experience in field of the international business law, significant experience in some special fields of law, services in eight languages, co-operation with foreign law firms and lawyers, membership at international professional associations, founding member of the regional legal association EAST LEGAL TEAM EEIG, complex services in co-operation with outside advisors, special offers for investors in connection with Hungarian real estate and construction projects;
MARKET APPLICATION
Investors and foreign companies which would like to invest, establish a new company or make a joint venture together with Hungarian or international partners in Hungary (and in Central East Europe) and need legal and other consulting services (real property management, auditing, investment and financial counseling, tax advice, auditing etc).

TYPE OF PARTNER SOUGHT
From each country of Europe, foreign investors who are interested in Hungarian investment projects, foreign companies which would like to co-operate with Hungarian companies or would like to acquire Hungarian companies;
Highland Management Consulting Ltd.

Organisation Details
Highland Management Consulting Ltd. is the exclusive agent of Premium Industries - Malaysia for the purging product PurgeMax. The product is used in the plastic industry during color and/or product changes. It is new on the European market and has a number of advantages against competitive products like:

- extremely easy to work with - just toss the packet (10 gramm of liquid Purgemax) into the hopper
- Effective on Hot Runner
- easy handling due to its size
- highly cost effective

Areas of Activity
Industry
  • Plastic industry

Cooperation Profiles

**Request: we are looking for Distributors in the plastic industry**
- We are looking for strong, reliable distributors in Europe
- We are looking for for end-users too

**SOLUTION OR EXPERTISE SOUGHT**
We are in the process to establish strong European distributorship for PurgeMax. We are looking for distributors already active in the plastic industry. Target is to have a limited number of strong distributors covering one or more countries.

**TYPE OF PARTNER SOUGHT**
Distributors in the plastic industry can benefit from PurgeMax in case they extend their product portfolio with PurgeMax as it can be sold to the same customer base, i.e. does not require additional sales-force, nor high net working capital.

Bodrogolaszi Rugógyártó Kft

Organisation Name
Country Hungary
City Bodrogolaszi
Street Ország út 1/A
Website www.bodrogrugo.hu
Organisation Type Company

Person
Name Zoltan Banoczy
Job Position sales and marketing manager

Organisation Details
Bodrogolaszi Rugógyártó Kft produces various springs (made of stainless raw material, too)

The springs made of wires of diameter 0,2 – 16 mm are produced by CNC controled machines in middle and large series mainly, but we can fabricate even one single piece of spring if required. Plate springs are made of 0,3 – 2 mm thick strips.

We produce a wide range of springs for technical purposes, for instance for household machines, various fields of engineering industry, cars, agricultural machinery, stationery and garage doors. If required, we also supply accessories for the springs.

In order to meet the needs of our present and future customers, we regularly invest with the help of competitions and using our own resources.

Our company introduced and has been operating a quality assurance system according to ISO 9001:2009 and an environment protecting system according to ISO 14001:2005.

Bodrogolaszi Rugógyártó Kft is ready to manufacture products realizing your ideas with utmost precision and with all expedition to satisfy all your requirements. Hundreds of satisfied business partners certify our reliability.

For further information please visit our website www.bodrogrugo.hu or contact us using the details below.

Job Position:

Organisation Details
Forwarding & Logistics
We organized our division around a small but highly motivated, experienced and enthusiastic staff: our colleagues have many-many years of experience in the freight forwarding industry. Our goals are straightforward and seek to ensure we run a professional company with our clients in the focus. We can provide our principals with the usual “delivery from A to B” solutions by air, truck and ocean freights, but of course we go further.

-Road transportation: organize inland and international FTLs & LTLs, we also offer special solutions for your ADR or reefer cargo as well.
-Air transportation: we ensure that your air cargo is transported to wherever in the world you want it to be taken. Do you need door-to-door solutions? No problem: we do it for you.
-Special air-charter & handcarry solutions: when something becomes really ‘hot’ and time is a killing factor there’s help. We offer 24/7 charter or handcarry coverage for your most precious and most important cargo.
-Sea transportation: FCL & LCL solutions all over the world.
-Customs brokerage: import & export customs clearance even after working hours and weekends; complete documentation as per the latest regulations; ATA-Carnet handling.

Sometimes you need more, looking for value added services. Here are some examples:

-L/C shipments' handling
-Online and direct connection with the airlines
-track and trace system for the easy reference
-pre- and oncarriage
-door-to-door services
-packaging
-cargo insurance
-warehousing
-on-board couriers and charter flights for top urgent shipments
-high value shipments' handling
-2 drivers / team operations
-transport attendance
-24 / 7 availability

Our goal is very simple: we would like to be your best partner and offer you the best price/value solutions through continuous development and technological innovation. We listen to you. We are looking for your feedbacks in order to deliver more than you expect. We hope that we may be a part of your esteemed company’s success via our services.
Should you have any questions, pls do not hesitate to ctc me anytime. If you have any shipments from/to Hungary, pls let us know, and we will take the necessary steps immediately in order to satisfy your needs.

DETE Dr. Tettenborn GmbH is an innovative company for surface engineering with a long tradition. In 1954 we already dealt with industrial paint technique. Today, DETE Dr. Tettenborn GmbH is established in many countries all over the world and your reliable partner for efficient coating technique and innovative services and products.

**INNOVATIVE ASPECTS AND MAIN ADVANTAGES**
Areas of activity Wet painting/drying technology, including:
- Electronic 2/3-component dosing and mixing devices
- Diaphragm-, piston- and bellows pumps
- Manual and automatic spray guns (conventional, airless, air assisted spraying)
- Accessory/spare parts for all brands
- Customized solutions for special applications
- Complete semiautomatic/automatic paint lines
- Manual/automatic/robot painting
- Drying/curing ovens, supply and exhaust air systems, pretreatment, conveyor systems
- Carbon management for paint shops, carbon footprinting
- Consulting in explosion protection

Some of our activities within the metal industry include the manufacturing of special metal structures. Besides, we also manufacture chip conveyor and material handling carts largely for companies engaged in chips. Our own product development includes containers, storage and means of transport, which, upon customers' request, are also offered with minor reconstruction.

We are based in Mezőkövesd (Dohány út) on a land of 16000 m², of which about 5000 m² is taken up by workshops, warehouses, social establishments and offices which are necessary for carrying out our activity. Using our modern equipment and tools, we manufacture all steelwork to be installed on the site of our Clients. We mainly provide solutions in North-East Hungary.

### Organisation Details

**French-Hungarian Chamber of Commerce and Industry**

*Our mission is:*

* to facilitate new and ongoing business relations between France and Hungary,
* to enlarge the local business network of our members,
* to provide professional assistance for French companies having a business project in Hungary.

### Some basic information about us:

- Our Chamber was created in 1991
- 221 companies are members (especially French subsidiaries located in Hungary)
- Our foreign business network consists of all chamber of commerce in France and 113 French chambers around the world

### Our services:

- *The communication department* deals with the organisation of business oriented events (Business lunches, conferences related to strategic topics, Speed business Meetings, B2B meetings, business forum with politicians, business clubs).

- *The commercial department* brings a large variety of services in order to help French companies in the realization of their business project on the Hungarian market (specific sectors information and potential business partners, organisation of appointments, translation services).

### Our communication medium:

- Yearbook with a detailed presentation of our members
- INFO is a quarterly magazine covering current events and specific topics
- monthly and ad-hoc newsletters
- website: www.ccifrance-hongrie.org

## Organisation Details

MetalTec 2001 Kft was formed with a 50%-50% German and Hungarian ownership in older premises some 12 km south-west of Székesfehérvár and 35 km south-east of Veszprém. By forming the company our aim was, primarily through our existing connections in Germany, to establish a production plant that can meet both the quality and quantity requirements of the automobile industry, the manufacturing of high voltage and sanitary equipment, as well as deep drawn and stamped parts. In 2002, the German partner left the company, since then the entire product range has been changed and by 2009 the volume of production has increased. In addition we have also extended the range and stock of our machinery. We enjoy a very good reputation amongst our clients.

Since the beginning of 2004 we have our own manufacturing cutting, bending and punching tools. Tools that are more complex or require larger capacity than ours are manufactured by our partner company (GNSZ Kft, Veszprém). They are also capable of the design and production of multi-staged complex serial tools. Our colleagues are trained and flexible individuals, who have the skills to manufacture simple, cut out, bent, pressed metal elements as well as complex multi-staged group parts both in an assembled and welded construction.

We also undertake the complete production of structures from exclusive or special steels that are welded or require combined processing technologies. We also have the appropriate experience for the production of pressure tested and pressure vessels.

### Production facility:

- **1,200 m²**
- **Size of plot:**
  - **15,500 m²**
- **Storage capacity:**
  - **500 m²**
- **Number of employees:**
  - **42 persons**

In the 2015 business year we started the construction of a new production hall of 1,200m², which will provide us with adequate production capacity for meeting the increasing demand for parts manufacturing. Currently the company is operating in accordance with the ISO 9001:2009 quality management system.

If we have been able to raise your interest please contact us for any potential future cooperation. We are available at anytime and also in person.

Organisation Details

WELDMINKER MŰVEK Zrt. evolved to be a key participant of the metal and metalworking industry in Hungary and abroad as a member company of WELDMINKER GROUP with 160 employees in total. As a result of market conditions and economic interests, we own dynamically growing factories and companies in Germany and Hungary. While complying with international environmental and health and safety requirements, we seek to expand our market and increase our competitiveness by the continuous improvement of the quality of our products and the related services. Our developments and investments are aimed at improving the quality of products and manufacturing systems, in addition to job creation and training professionals. Our facilities and production halls have a suitable capacity to meet market demands. We hold MSz EN ISO 9001:2008, DIN EN ISO 1090-2 and EXC-2 qualifications as well as DIN EN 3834-2 certifications.

The company group has undergone dynamic growth recently which enabled the realization of significant investments and improvements. Currently, the expansion of a factory hall is in the licensing procedure in one of our existing sites in Hungary. For the design and manufacturing of equipment, we have our own production base – professionals with adequate knowledge, prepared for the realization of complex technical tasks, suitable service background and well-equipped factory halls.

The scope of activities of the Weldminker Group extends to the following areas: Design and manufacturing of metals and metal structures as design and manufacturing of mining equipment and parts, design, manufacturing and repair of hydraulic actuators, design and manufacturing of agricultural machinery and parts, manufacturing of machine structures, manufacturing of support structures, manufacturing of rail road vehicles and parts, manufacturing of containers and appliances. Rebar processing – cutting, bending, welding, manufacturing of precast concrete products, wholesale of machinery and equipment, temporary employment services and provision of personnel, training of professionals.

Our key principles are quality, reliability and competence. On the basis of their several years of experience, attitude and methodology gained in Hungary and abroad, our professionals are capable of providing complex engineering services, including design, professional consulting, production management, production, installation and maintenance.

We are in cooperation with several universities, by which we seek to provide the best available offer for our domestic and international partners, through specialization in the design and manufacturing of our products. Our objective is to provide the best available solutions by continuous innovation and flexibly meet customer demands at high standards.

Organisation Type: Company

**Person**
Name: Gabor Kocsis  
Job Position: General Manager

**Organisation Details**
One of Company's business activities is the wholesale and trading of first-class, general and special-purpose original plastic granulates domestically. The plastic granulates are manufactured in several European and non-European petrochemical companies (Example: ENI, Exxon Mobil, Slovnaft, TVK, Unipetrol, Rompetrol, SABIC, Qatar-Chem, Neo Group, Basel). Plastic granulates offer considerable price advantages to existing and prospective partners.

The other innovative profile of our company is, trading, designing and constructing reinforced composite plastic products, floor gratings and sheets, railings and railing systems, ladders, manhole covers, fences, stairs and stairstep coverings, hollow sections - mainly for the industrial users. We offer consulting to support your needs before implementing.

The third profile of our company is serving the plastic parts user companies with the full range of injected plastic products through developing the prototype and manufacturing of final injection moulds and delivering the final plastic product.

**Areas of Activity**

**Industry**
- Automotive  
- Engineering  
- Plastic industry

**Cooperation Profiles**

**Offer:** Reinforced plastic products and plastic solutions wide range

One of Company's business activities is the wholesale and trading of first-class, general and special-purpose original plastic granulates domestically, and thereby supplying plastic injection part manufacturers. The plastic granulates are produced in several European and non-European petrochemical companies (Example: ENI, Exxon Mobil, Slovnaft, TVK, Unipetrol, Rompetrol, SABIC, Qatar-Chem, Neo Group, Basel). Plastic granulates offer considerable price advantages to existing and prospective partners. The other innovative profile of our company is, supporting our business partners with reinforced composite plastic products, floor gratings and sheets, railings and railing systems, ladders, manhole covers, fences, stairs and stairstep coverings, hollow sections - and the trading, design, implementation and management of this composite goods, mainly for the industrial users. We offer the possibility of consulting in order to find the best solution for our clients, who are interested introducing new and leading technologies. The third profile of our company is serving the plastic parts user companies with the full range of injection moulded plastic products, through developing the prototype and manufacturing of final injection moulds and delivery of a final plastic product.

**INNOVATIVE ASPECTS AND MAIN ADVANTAGES**

Reinforced Plastic Products, like handrail systems, ladders, coverings, stairs, walkways and non slip floors which are only a few options to applications. Main Advantages - Light weight, high strength: easier to transport and install with standard tools - Corrosion resistant: restructural shapes will not rot, rust, warp or bow - Long-lasting: lower lifetime cost than traditional building materials - Dimensional stability: no shrinking or swelling - Non-conductive: will not conduct electricity - Non-magnetic: can be used around sensitive electronic equipment - Low thermal conductivity: it is a...
good insulator - Transparent RF : does not interfere with radio waves - Impact resistant : distributes impact load to prevent surface damage - Lifetime: up to 30 years, it is a cost efficient choice.

MARKET APPLICATION
Almost every industry can utilize our reinforced plastic products, where the main profile is manufacturing.
Arundo Celluloz Farming Kft.

Organisation Name
Country: Hungary
City: Budapest
Street: Berlini ut 47
Website: www.arundo-donax.com
Organisation Type: Company

Person
Name: Szabolcs Koczka
Job Position:

Organisation Details
We grow Arundo energy cane ecotypes using an unparalleled technology and also sell them in line with market needs. We are the owners of the exclusive international production and sales right of Arundo’s stem cell based micropropagation patent.

Our high-tech micropropagation laboratories produce virus-free, robust and homogeneous plantlets.

In Hungary our offer is primarily aimed at municipalities to help them find a complex solution to shifting away from gas heating to a renewable source of energy by relying on Arundo energy cane plantations.

At international level the Arundo energy cane can be produced to provide bioethanol factories, biogas plants, biomass power stations, steel and paper mills with raw material.

For this purpose our company can supply the micropropagated plantlets and the cultivation technology.

Environmental protection is at the heart of our activity and we are committed to the principles of sustainable development. Let’s work together for both our Earth and energy independence!

Windcraft Development Kft.

Organisation Name
Country: Hungary
City: Budapest
Street: Üllői út 431
Website
Organisation Type: Company

Person
Name: Tamás Kovács
Job Position: CEO

Organisation Details
Windcraft has developed a new vertical axis wind turbine (VAWT), for which the mechanical design has been successfully implemented in the construction of several test turbines – the results of which, together with the simulations on the optimal blade profiles predict that the Windcraft turbine will be more efficient than any other VAWT and most major HAWT (horizontal axis wind turbine) designs currently on the market.

Areas of Activity
Industry
• Renewable energy

Cooperation Profiles
**Request: Financial Cooperation for Wind Turbine Development**
We are seeking an investor to cooperate with in order to finish the development of our turbine and further enhance its advantages and efficiency. • Further aero-dynamical optimization of the turbine, including two steps: o Validation of the results of the previous two dimensional aerodynamic optimization through the construction of a test turbine; and measurement. o Repeating of the process using three-dimensional optimization • Development of the generator and the inverter. (The design calls for a customized permanent magnet brushless alternator, as well as a customized inverter.) • Combining the previous results into a final prototype • Finance the certification process of the final, fully optimized design • Covering the ongoing patent costs

**Cooperation Profiles**

**Request:** Hungarian co-organizer is looking for clients for cooperation with Hungarian companies in field of renewable energy, biomass, waste management, pneumatics.

The Northern Great Plain Region is historically one of the largest producers of agricultural goods in Hungary. The agricultural production in the region can be divided between small individual farmers and larger producers or cooperatives. The primary agricultural products are sold to local processing and canning facilities or being exported. The county has borders with Slovakia, the Ukraine and Romania. Main products are apples, cherries, melons, tomato, pepper, potato, etc. Due to the agricultural nature of the region we can easily reach SMEs for events organized by ASG, we can cooperate with EEN partners in neighbouring countries and thereby reach foreign companies. There are many agricultural exhibitions (Expo) in this region we can participate on them. The services of the Network are displayed on every larger national exhibition or fair with colleagues operating info stands.

Mission and Vision
INNOSKART, as a business oriented cluster focusing on innovation, is an active and reliable partner in transnational cluster collaborations.

Sector
ICT

My Cluster Organisation is related to the following additional sectors: health industry, agriculture, energy efficiency.

The INNOSKART ICT Cluster was founded in 2006. Cluster is horizontally organized, members basically SMEs from the IT sector. Our strategic aim is to encourage R & D & I projects collaborations involving businesses from different emerging industries. One of the expected benefits of our network co-operation is the knowledge creation and transmission, so we have 3 universities and two Knowledge Centres among the more than 50 cluster members. In addition, we have companies from other sectors, like construction, metalworking and business advising etc. in order to facilitate wider access to IT-based innovation development cooperation work. The cluster management functions belong to the Innoskart Nonprofit Ltd. set up in 2008. The most important cluster management service is the innovation management consultancy to support the continuous development of cluster enterprises' innovation potential.

The key objective of the INNOSKART ICT Cluster is to go international. The cluster’s International Working Group within the period from 2009 up to now has implemented more than thirty international projects successfully; the majority of them are FP7 R & D & I projects. The goal of the working group is the active participation in the COSME and H2020 program, as well as interclustering activities strengthening the export market appearance of the cluster members.

The cluster management organization’s service development activities to support innovation are related to several European Union funded projects like Central Europe (CEBBIS project) and South East Europe (SEE_INNOVA project, where Clusterland Austria is also in the consortium and PPP4Broadband project), and even to Swiss Contribution Programs. We have professional relationship with the Swiss tcbe.ch ICT cluster that allowing us to join a number of international professional consulting groups. We are also the members of NATUREEF ESCP consortia and ICT meta-cluster set up within the frame of ClusterCord Central Europe program. The INNOSKART ICT cluster is Accredited Innovation Cluster (the highest Hungarian cluster quality) and we also awarded the ECEI Silver Label.

Areas of Activity
Industry
- ICT

Cooperation Profiles
Offer: Cross-sectoral cluster cooperation
Innoskart ICT Cluster (www.innoskart.eu) has 55 committed members: 46 SMEs mostly from the ICT sector, 3 universities, 2 research centres and also 4 business development- and innovation agencies from Hungary, Czech Republic, Slovenia and Slovakia. The main competencies of our cluster are: IT Security Solutions Wireless Sensor Networks Intelligent Buildings IT consulting services Medical Informatics (IoT, M2M) The INNOSKART ICT cluster is Accredited Inno-
vation Cluster - only 10% of the Hungarian clusters have this highest Hungarian cluster quality label. INNOSKART, as the first excellence cluster in the South East European regions, was awarded with ECEI Silver Label in 2014. Innoskart is funding member of Hungarian National Association of Innovative Clusters, funded in 2014. One of the targets that brought the Association alive is to strengthen Hungarian Clusters and bring them on international markets unified. INNOSKART registered in Cluster Collaboration platform in 2010 (http://www.clustercollaboration.eu/web/41693),

INNOVATIVE ASPECTS AND MAIN ADVANTAGES

Our strategic aim is to help our cluster member companies to strengthen their presence at Hungarian market and also to go beyond the country borders towards international markets. Cluster management also encourages their cooperation, R&D&I project collaborations, the knowledge creation and transmission. Specific focus: Our no1 & no2: objectives in parallel are strengthening market positions on national market and going international in EU. Specific focus no3: boosting cooperation among cluster member companies to increase innovation and for competitive advantages. Specific focus no4: boosting knowledge transfer among clusters in international level Innoskart's member companies are mainly working for and selling on the Hungarian market. Hungarian market is a small market and therefore gives limited developing possibilities to companies which desire to grow. So the cluster is focusing on a more and more characteristic international, European and oversea, market presence, beside the national one.

MARKET APPLICATION

Going international is a strategic goal inside the cluster and is supported by transnational cross-cluster cooperation. According to our cluster development strategy we have companies and knowledge institutions from other sectors (e.g. agriculture, health industry etc.) that help to boost the innovation and developing of ICT supported solutions within the cluster's cross-sectorial cooperation. Agro-IT, Health care and Energy Efficiency are the specific sectors of our networking. Innoskart is the member of the NATUREEF European Strategic Cluster Partnership (www.natureef.eu)

| Alba-Zöchling is an international forwarding company. Our company was establish in 1989, among the first independent companies after the regime changes. In the last 26 years we could grew because of our trustful and precise work. So far we own 100 trucks and 10,000 squaremeters warehouses. We have quite a lot client among the international multi companies and the Hungarian smaller producer firms as well...
| Though we have quite a lot spare capacity, so we could offer our service.
| Our main target countries are BeneLux states, Germany, Luxembourg, Spain, Portugal, France. |
REGALE Energy Co.Ltd.

About REGALE Energy Co. Ltd.:

dr. Béla Paár has founded company REGALE Energy in 1991. Since then, we grow continuously, as in terms of employees as well as financially. Our financial situation is orderly. We finance our projects, investments, and developments, current assets ourselves. We have no credit at banks or money institutes. Our annual revenue as for the past years is about 3 - 7 Million Euros. The year of 2010 was exceptional, with 16 Million Euros of turnover despite of the crises, we are very proud of this result! We work with our own employees who are now 40; most of them have professional education. Our people attend language courses, domestic and foreign professional trainings regularly, some of them are publishing in the craft press. Our company obtained the TÜV Hannover ISO 9001 qualification in 1997 by which we are still operating after. Throughout the constant increase of our company it was always our main purpose to achieve the highest possible customer satisfaction.

Our company has a stable share on the domestic HVAC market, in terms of maintenance, service and is a pioneer in the introduction of innovative energetic systems. Like Co- and Tri-generation systems in domestic and foreign markets, since the early 90s. Our goal is to establish a complex building- and energy engineering service on the domestic and foreign market as well – taking the local specialties and the diversity of the devices into consideration – which enables for the present and future partners to find and implement the ideal solution for them.

Without attempting to be comprehensive we emphasize some of our specialties, range of activities such as:

- Application of commercial and industrial cooling / heating / ventilation
- Co- and Tri-generation with appliance of Micro Gas Turbines
- Geothermic and waste heat utilization
- Cooling with Solar Energy by the help of low performance absorption chillers
- Energetic audit
- Diagnostic
- System design and payback - return of investment - calculations
- Appearance on CO2 market as strategic partner
- Independent brand maintenance service
- Exercise of technical supervisory tasks
Our highly qualified professionals with designing, producing and operating routine, such as building engineers, sales engineers, economists, cooling-technicians are at your disposal with holistic engineering and maintenance services, 24 / 7 throughout the past 25 years.

Product Range and Brands:

Thanks to the devoted work of our Team, we hold a wide range of exclusive products needed in our field. Our product palette is as follows:

<table>

Some of our references out of the 25 years of operation are:

Renewable Energy:

1. Geothermic Energy - Ground source system
   TESCO, Hospital, 2000m2 Office Building
2. Geothermic Energy - Groundwater wells
   Hirtenberger, The Whale Budapest, India sports hall Serbia
3. Geothermic Energy - Cooling with sun collector
   TESCO, National Secret Service Hungary

Energy rationalization:

Hydrobank systems

Auchan, Plazas, Campona, Hospital, TESCO

1. Roof - Top converting to heat pump mode possibility
2. Roof - Top control according to CO2 sensor
3. Air Fan control with electronic inverter
TESCO hypermarkets (modified 400 !! units)

Industrial - Technological Cooling:
General Electric, Waste Incinerator Romania, Milk cooling

Micros - Gas Turbine projects:
TESCO, MOL - Hungarian Oil & Gas Company, CKD - Ostrava in Czech Republik, Hotel in Bp.

Cogeneration systems in Hospitals:
Szent László, Jahn Ferenc, Kecskemét and Csolnoky Ferenc Hospitals

Entertaining, shopping chains and centres:
Euro Center, China Markt, Atlantis, Park Center, etc.

Office buildings, leisure and educational institutes:
AEB Office, Pázmány Péter Academy, College, SOTE, etc.

Maintenance:

REGALE Energy disposes of a stable supplier background. Our technical service is available throughout the whole country and is available all year around, 24 hours daily. Among the roughly dozen significant HVAC companies on the market, we do not intend to become the first in turnover, but our main goal is to win the service provider’s quality competition.

One thing less, to worry about....

**Organisation Details**

Celsius Plussz Ltd. was established in 1990. The founder of the company has been dealing with development and production of solid burning boilers since 1982. The main activities of the enterprise include planning, developing, designing and selling of solid burning boilers. The company has manufactured correct products according to market demands since the establishment. Main products are wood, pellet, wood briquette, special straw bale burning and wood log burning boilers. The company provides solutions for family houses as well as industrial and agricultural buildings. The company also offers central heating solutions for buildings without any boiler room and other heating facilities - container built in solution (all equipment for the central heating system built in a container) ready to use.

**Areas of Activity**

## Organisation Details

Machine tool building in Csepel has been going on since **1929** at MANFRED WEISS WORKS.

Radial drilling machines, centre lathes, knee-type milling machines, single-purpose machines were built.

As a result of the serial production, more than **40,000 Csepel machine tools** have been delivered to more than 60 countries around the world.

In **1965** the first **NC lathe** and **NC milling machine** were produced at the company.

In **1970** the **machining centres** were developed and the licence-based production of precision thread-grinding machines and the development of high-precision gear-grinding machines were also started.

The currently production program consists of developing and building of **single-purpose machines**.

## Areas of Activity

**Industry**

- Automotive
- Engineering

## Cooperation Profiles

**Offer:** manufacturing of CNC lathes, machining centres, production of parts for automotive industrie, technical and technology support, overhauling

- Full technological elaboration of parts production, designing and implementation of special-purpose manufacturing systems, integration of loading-unloading units and measurement of equipment into one system to comply with customer’s requirements. - Ultraprecision lathe with hydrostatic spindle and slide system design, fitted with linear motor drive and options e.g. B axis. Surface quality: Ra 0,04 - Machining centers with extremly large working area designed in module system to comply with manufacturing requirements. - overhauling

For a company to succeed in the long term it is necessary to prepare and deliver a timely strategy for the international market entry. We at Creative Expert Consulting have been providing expert support in this field for 20 years.

As your competent partner we connect your business to international markets.

If you run a successful business and believe that your products and services will succeed in new markets, contact us and explore the potential of exporting to international markets.

Creative Expert Consulting

- fast response and cost efficient
- has a wide range of business links
- knows the local business cultures
- employs native speakers
- and has local representations

No matter what industry or activity – we will find potential clients for your products

The markets where we operate include the following countries:

**Russia, Germany, Hungary, Ukraine, Austria, the Czech Republic, Slovakia, Serbia, Croatia, Slovenia, Kazakhstan** - these are the regions where we have managed to establish business co-operations for our clients.

We have successfully found partners from the following industries: food and beverage, engineering, furniture, lighting, pharmaceutical/medical and IT... and are continuing to add more.

We do not promise you the moon but rather a conscious and thorough market development.

We have communicated with over 15,000 companies in the last two years, and have successfully connected partners from several sectors such as food & beverage, machinery, furniture, lighting industry, IT, pharmaceutical/medical, etc., mostly within 2-3 months.

**Use this opportunity and enter the largest emerging markets in Europe!**

We would like to briefly present the developed in 2005 HUNGARY'S FIRST DIGITAL TANANYAGBÁZIS Platform, and area of operation. The first Hungarian DIGITAL TANANYAGBÁZIS Kft. In computing, a special fast-developing today, the interactive tables részterületével distribution, use and the associated teaching resources (digital and interactive) deals with production and development. We help schools, most appropriate for them to be aware of the interactive field, as well as interactive devices to felszerelünk after the time of purchase, and is placed into it.

What we did was to make the needs tananyagbázisunkat assessed also (for the first Hungarian Digital Tananyagbázis, EMDTB). The tananyagbázis (both digital and interactive part of an excellent as a training support both) can be used, as not only an educator that makes it easier for the work, but also by students in the more interesting, more colorful the sometimes monotonous also allows you to education. In the playful EMDTB shall be introduced by the lower tagozatosokat the writing, reading and counting world, the upper tagozatosoknak ambience to make sometimes diffi-
cult teaching and curriculum guide contains many very effective literacy teaching.

The interactive tables, interactive tools, and interactive (and digital) curriculum even more efficiently in order to be able to use multiple course we educators. One of the tanfolyamunk the interactive tables, and other interactive tools and education teaches effective application of the trainees. To do this, the theme is connected to add to knowledge of the necessary software. Multiple use of the software are used to show the course participants. First, the software will view each field (both benefits and right) and then in the later education in you want to use a thorough and compre-
hensive software is about. The route can be redistributed to the interactive teachers (and digital) can be used to pre-
pare teaching material software. Another tanfolyamunkon linked to the interactive devices classmate PCS to effective use in education are presented. The classmate PC to the essence of it, to describe the interactive curriculum on this plate is placed before the students on (classmate PC), that can work freely. Training Sessions is always the client edu-
cational institution is transformed according to your needs, it is placed greater emphasis on the tananyagrészre,
which the school considers important, it considers relevant.

Preparation of Tananyagbázisunk aim, to be used as training guide is to facilitate, as well as the teacher's work can be more effective training of the students. The first Hungarian Digital Tananyagbázis Kft. It believes that the interactive plates, interactive tools, and the tananyagbázisunkkal (as a training support) can not only designed the teaching, but you can increase the school's reputation, which contribute to the children and young people of the effective training.
### Extremplast Bt

#### Organisation Details
EXTREMPLAST company was established in year 2000. It is located in Székesfehérvár next to the M7 highway, not far from Budapest. As a leading distributor in the Hungarian plastic market we deal with wide range of machines. We supply injection molding machines, blow molding machines and also other plastic industrial auxiliary equipment such as granulators, shredders, dryers, auto-loaders, mixers, etc. Our selected machine suppliers are from Taiwan and Turkey, which assure a competitive price with good quality.

As a reference we supply to more than 300 Hungarian enterprises.

Organisation Details

The Zala County Foundation for Enterprise Promotion was founded in 1992 in Zala county with the contribution of the Local Government of Zala County as a sole founder. The objectives set at the establishment of the Foundation have not changed basically in the last few years: fostering economic development in Zala county, supporting the formation, survival and, first of all, the growth of micro, small and medium-sized enterprises, an enterprise promotion office network self-supported in the long run i.e. the operation of a central office and county sub-offices, which are of assistance to the entrepreneurs in the county with high-standard, adequate and accessible services and projects.
The Electrotechnical Factory Kaposvár Ltd. have been producing electrical equipments since 1967. The factory have been privatized in 1993. Now it is operating as an Ltd. The number of staff is average 400 person, the revenue is more than 4 billion Ft.

The Electrotechnical Factory Kaposvár Ltd. have been developing, producing and distributing fuses, terminal blocks, electrical equipments and devices for over 40 years.

Our pole switches with hand drive or with remote control, low voltage and medium voltage distributing equipments, transformer stations, high voltage fuse bases can be found on the area of every power supplier, and we also produce disconnectors, distributing equipments, remote controlled motor drives for the electrical grid of the rail public transport (railway, tram, subway, trolley). We have several decade of experience about the speciality deliveries. 70% of our inland market is realized on the areas of the power suppliers.

We export more than 40% of our production. Our thermosetting terminal blocks, which are transported to Weidmüller factory, are known worldwide. We are transporting our low voltage fuse links to almost every country in Europe.

15-20% of our market is service. In addition to our own used production we make wage work in our galvanic plant, where not only hand galvanization can be found but semi automatic and automatic galvanization too.

In possession of the several years experience we gained in the field of developing and producing electrical equipments and devices, we are developing and producing our products in accordance with the needs of the market and our customers. As a result of the continuous development our product structure is up to date, the technical parameters of our devices and equipments satisfies the needs of the west market too.

Thanks to our well qualified experts we can offer simple but modern solutions in case of the mass produced devices and also in case of the devices and equipments which satisfies the special exclusive needs. If necessary we can make a local survey before the developing process. If it requested we can provide education and local technical management during the installation process.

We provide to our quotation partners a direct consultation with our experts whether it is mass produced product or special product. After the consultation we give an offer to the created construction.

In 2003 and 2004 we won the award on the INDUSTRIA exhibition with our pole switch and with our transformer station family.

The activity of our company was rewarded in 2010 by the Dél-dunántúli Kereskedelmi és Íparkamarák Szövetsége (Society of the South Transdanubian Trade and Industry Chambers) with the DDMD prize.

The criterias of the quality of our product structures corresponds to the europian standards.

Since 1996 we have been developing , producing and distributing our product in a quality management system according to the ISO 9001. The KVGY Ltd. keeps in mind the interest of the enviroment protection and the future generation during its activity, so we operate an enviromental management system according to the ISO 14001 standards.

HEMOTEHNA D.O.O.

Organisation Details
farmaceutical industry, food industry (alcoholic drink and vine), chemicals industry

Areas of Activity
Industry
- Plastic industry

Cooperation Profiles
Offer: We have bottle for You
Our company Hemotechna d.o.o. is leading producer of PET (polyethylenenteraphtalate) bottles, for cosmetics, pharmaceutical, food (alcoholic, energetic drink), chemicals (household chemicals, pesticides). All our product you can see on our web sites: www.plasticna-boca.rs or www.hemotechna.rs. Since September 2007 the company's management team has set up a maintainable control system which is ISO 9001:2000 and ISO 14001:2004. This allows to as export activities. If You are interested in our products, or You have a new idea, or have any questions, please do not hesitate to contact us.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES
Every year we have some new product.

MARKET APPLICATION
Packaging chemicals, pharmacy, alcoholic drinks etc.

TYPE OF PARTNER SOUGHT
Hungary, Romania, Austria, German, Slovenia,
ELDON Group is a family company, founded in 1972, located in Smederevska Palanka (80 km south-east from Belgrade).

Our specialty is the production of parts of all kind of steel and iron, grey cast iron, inox, aluminum, bronze, brass, plastic, and rubber.

More than 15 years we have produced standard parts in serial production for customer Zastava Automobili (now Fiat) in Kragujevac.

Now, we are looking for new customers and investors for the long cooperation.

We are ready for development and serial production.

**We offer:**

Parts of all kind of steel and iron, grey cast iron, inox, aluminum, bronze, brass, plastic and rubber

Individual or combined components of different materials in small and large series

Injection molding parts (plastic, aluminum) using our or client moulds

Casting aluminum, bronze and brass

Components for engine and electric power installation

Interior and exterior plastic parts (buttons lining, buckles for upholstery, etc)

Accessories for doors and windows (locks, handles, hinges, mirrors, caps, etc)

Different parts (sliders, holders, caps closures, stoppers, caps, coils, springs, patents, bushings, washers, screws, bolts, gears, etc)

**Manufacturing capacity**

Plastic Injection
Foundry for aluminum, bronze and brass

Mechanical processing (grinding, surface treatment, blasting, cutting, minting, punching, perforation, welding, reparations)

Development of tools and models-mould making

Ironmongery and metal sheeting works
Welding  TIG, CO2, REL
Lacquer-Painting
Final assembly
Warehouses

**Production line**
Parts for the automotive and truck industry
Electrical equipment and installations
Electronics
Alarm devices
Light equipment
Parts for air conditioning and gasification
Equipment for metal foundries
Machines for grinding/recycling plastics and foil

Organisation Details

The investment foundry MAGYARMET looks back on more than 30 years of experience and is nowadays not only the leading Hungarian investment foundry, but a well-established European subcontractor for various branches of the processing industry, i.e. pumps and valves, power engineering, food processing, chemical engineering (petrol chemistry), filtering, dosing, packing and further processing industries, big motor production, railway equipment, architecture etc.

The company applies the lost wax process for producing mainly in small and medium sized series. The biggest feasible part would be about 40 kg, with max. dimensions 500 x 400 x 300 mm. Typical products of the company are valve bodies and discs, pump impellers and housings, fittings, exhaust knees, railway brake parts, various machine parts, etc.

MAGYARMET unites the precise and reliable lost wax process with a wide variety of materials: low- and high-alloy steel (corrosion- and heat-resistant), wear-resistant alloys, bronze, Ni- and Co-based alloys. The company owns a modern CNC-machining shop and is able to supply ready for assembly components.

Areas of Activity

Industry

• Engineering

Cooperation Profiles

**Offer:** MAGYARMET proposes to produce and supply various machine parts acc. to client's drawings, production method is precision investment casting

MAGYARMET is searching contacts to companies from various sectors of industry, who would subcontract parts for the machines or equipment they are producing. Based on the client's drawings and using the reliable and precise lost wax process and mechanical machining, the foundry is able to supply complex parts for valves and pumps, food processing, chemical engineering, vehicle production, power engineering etc. Materials used are low- and high-alloy-steel (corrosion-, heat- and wear-resistant), nickel- and cobalt-based alloys.

**INNOVATIVE ASPECTS AND MAIN ADVANTAGES**

Reliable production process using up-to-date equipment and robots in production, high precision and smooth surface of castings, production of complex parts and application of modern technologies (Rapid Prototyping, CNC-Machining, automation), big variety of materials for various high requirements. Wide service range: planning and production of wax injection tooling, consultations on castable designs and applicable materials, mechanical machining, heat and surface treatment, Rapid Prototyping and Rapid Manufacturing.

**MARKET APPLICATION**

Our products are used in pumps and valves; petrochemical, food processing, packaging, filtering, chemical and environmental processing equipment, big diesel engines, railway and automotive equipment.
TYPE OF PARTNER SOUGHT
Our potential partners are supposed mainly in Europe and produce machines or equipment and use in their production as an input casted or casted and machined parts of steel or special alloys.
Török Gépipari Kft

**Organisation Details**

Török Machining Ltd started its new anodizing activities with at present one of Hungary's most up-to-date automatic crane way operated production lane.

We do protecting anodizing, precision anodizing and colour anodizing.

With our 2, 2.5, 3, 4, 5-axis CNC milling machines we make specimens, based upon drafts and 3D models. For modelling the components Solid Edge and Edgecam softvers are used.

**Further technologies:**

Driven - tool CNC surfacing, CNC surface grinding, Wire - EDM, 5-axis CNC coordinate measuring, traditional lathe and CNC turning

Seacon Europe Ltd.

**Organisation Name**

Country: Hungary  
City: Székesfehérvár  
Street: Móricz Zs. u. 14.  
Website:  
Organisation Type: Company

**Person**

Name: Zsolt Viniczay  
Job Position: director of R&D

**Organisation Details**

**Core Business**

As R&D intensive SME Seacon Europe specializes in business intelligence, software development, consulting, and project management. With customers in industries ranging from Energy to finance, government and telecommunications, Seacon Europe is leading in innovative solutions based on software development, consulting, data management/processing, system integration, management information systems, business solutions and data warehouses/business intelligence. As integrator of the former Central Trans Danubian Regional IT Cluster (now known as Innoskart) Seacon Europe is committed to realize the potential of innovation driven IT development based on cooperation in the region.

**Main expertise**

Seacon Europe Ltd is attentive to the innovation and cooperation work. We are leading in innovative solutions based on:

- Software development  
- System Integration  
- Data management  
- Data Warehouses and Management Information Systems  
- Business Solutions  
- Consulting  
- IT and Information Security  
- Fraud and Abuse Exploration  
- Development based on Artificial Intelligence

**Main products / services**

On the other side the strengths of the Seacon Europe manifest in his home developed products.

- SeaLog – Seacon Digital Tracking  
- SFA - Seacon File Audit  
- SARM - Seacon Access Rights Monitoring  
- SeaFleet - Seacon Vehicle Fleet Handling  
- Virgis – Map-based Business Analysis

The main pillars of our operation are the solid professional competence, partner network established over years, state-of-the-art IT background and market-leading software technologies. Our mission is to support effectively our clients in achieving their business goals. Besides the customized special developments we offer also variable modular systems, which provide fast and efficient solutions to clients' typified business problems. This enables us to provide appropriate and affordable solutions not only to the big corporations but to SME as well, keeping of course high quality standards.
Areas of Activity

• ICT

Cooperation Profiles

**Request:** Research & development: Looking for partners concerning EU H2020 Cooperation

Seacon Europe as IT oriented R&D company and innovative SME is interested to access funding opportunities of the EU research & innovation programme Horizon 2020 and it is going to find partners for project proposals submitted to this programme. It is specialized in software development and consultancy, the main profile is planning and developing applications and solutions supporting business processes and R&D. As special profiles can be highlighted the energy and digital security areas additionally mentioning the data processing/analyzing and the digital tracking. In the last years we had more projects based on wireless sensor networks focused on energy rationalisation, agriculture, forest protecting, manufacturing. Some specific projects: • SeaLog – Digital security, digital track analysis • SeaForest – Forest protection • SeaERA – Energy rationalization • EnergyAInspector – Building Energetic Simulation • CANLog – CAN-bus Logalyser / Intelligent and Integrated Fleet Management • Virgis – Map-based Business Analysis / Decision support • IntelliFood – Industrial Quality Management / Intelligent Process Monitoring

**SOLUTION OR EXPERTISE SOUGHT**

Working on more area (energy, security, FoF, IoT, Smart cities), of ICT research and development we are looking for partnership or consortium.

**About Us**

**Moore Stephens globally**

Moore Stephens International Limited is a global accountancy and consulting network with its headquarters in London. With fees of US$2.68 billion and offices in 105 countries, you can be confident that we have access to the resources and capabilities to meet your needs. Moore Stephens International independent member firms share common values: integrity, personal service, quality, knowledge and a global view. By combining local expertise and experience with the breadth of our Hungarian and worldwide networks, clients can be confident that, whatever their requirement, Moore Stephens will provide the right solution to their local, national and international needs.

Our objective is simple: to provide clients with the support they require to meet their objectives. This strategy has not only proved beneficial to our clients, but has been one of the driving forces behind our significant growth over the last few years.

Our aim is to react quickly to our clients’ needs. With member firms in over 600 locations across the globe, clients can feel confident that there is a Moore Stephens expert in close proximity to them. And as Moore Stephens International grows, so does our global reach.

**Moore Stephens in Hungary**

Moore Stephens Wagner has specialised in providing audit, accounting and advisory services to their international clients for more than 20 years. With more than 50 experts in audit, tax, accountancy and IT we provide a wide range of services to assist clients in meeting their cross-border commercial objectives, which are complemented by local services to support their national operations.

**Areas of Activity**

**Industry**
- ICT
- Automotive
- Engineering
- Plastic industry

**Cooperation Profiles**

**Offer: Tax and Payroll Support**

Payroll and employment administration and advisory services We provide general employment and payroll administration services and beyond that: We use KulcsBér which is immediately built in the client’s HR and ERP systems via computer connection. All reports generated by KulcsBére are accepted by the local authorities. E-payslip services allow the employees to access their payslip immediately after monthly payroll processing through their own personalised account. Learn more about the e-payslip service here. Besides the general payroll reports NEXON is capable of provid-
Preparing customized reports as well (and submit to the client via e-mail). Preparation of bank transfer import files for all banks saving valuable time for the client. We prepare English and German language management reports, and provide foreign language communication. We also perform social security and family allowance payment centre services. Our objective is continuous development of web based payroll services, but at the same time we adopt to our clients needs of personal interaction, therefore our colleagues are available in any of our offices in Budapest and Győr. On request we provide on-site payroll and employment administration services.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES
Why to choose payroll outsourcing? Among numerous advantages of payroll outsourcing, the most significant may be cost efficiency. Cost savings in staff salaries- and training No need to purchase or lease costly payroll software Dramatic decrease of administrative burdens No dependency on payroll staff Timelyness knowledge of payroll related laws and regulations No unauthorised access to employee’s payroll data

MARKET APPLICATION
Automotive industry and/or manufacturing companies.

TYPE OF PARTNER SOUGHT
All firms who employ less then 500 employee under Hungarian legislation.

Offer: Transfer pricing advisory and administration
From 1 January 2003 a new transfer pricing documentation requirement was added to the Act of Corporation Income Tax followed by an edict of execution. The new regulations require taxpayers to document each qualifying inter-company transaction (with regards to some exceptions) latest until the deadline of annual corporate tax return, ie. until 31 May of the subsequent year for companies with normal business year.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES
How can we help? Review existing transfer pricing documentations for Hungarian tax purposes, Prepare EU masterfile and/or country specific transfer pricing documentation in line with local regulations, Urgent assistance in case of tax investigations.

MARKET APPLICATION
Automotive and related industries. Other manufacturing firms.

TYPE OF PARTNER SOUGHT
Firms who is doing business with their related companies above 50 million HUF.

Offer: Statutory Audit services
The purpose of a statutory audit is the same as the purpose of any other audit - to determine whether an organization is providing a fair and accurate representation of its financial position by examining information such as bank balances, bookkeeping records and financial transactions.

INNOVATIVE ASPECTS AND MAIN ADVANTAGES
At Moore Stephens, our goal is to add commercial value through all of our services - and that includes audit. We recognise the importance of providing assurance on business controls so that there are no surprises. Equally, we understand the need to provide advice to help our clients develop their business. The Moore Stephens audit approach is based on developing a sound understanding of the business and the financial risks that face it. By agreeing expectations at an early stage the audit is focused on the requirements of the business. This enables us to provide an audit opinion on the financial statements while still presenting the business owner with useful information to assist in future development.

MARKET APPLICATION
Automotive industry and/or manufacturing companies.

TYPE OF PARTNER SOUGHT
Firms with over 300 million HUF turnover.

Cooperation Profiles

**Offer: System development services - custom software development**

Specific data processing applications are available even in this ever changing information technology age. You may not find off-the-shelf applications perfectly fulfilling your unique requirements and specific needs. Enhancement of operations, accountability, efficiency can be done through using of software with easy-to-use and friendly user interfaces.

**INNOVATIVE ASPECTS AND MAIN ADVANTAGES**

Our strength is that we are a software development company with decades of experience in IT. First, we understand the goals, than we design, next implement or even integrate systems. We were involved in dozens of development projects, including manufacturing management system, very large database management systems, web based systems and some special projects. You can still focus on your business, goals, procedures and work-flows with a partner...
who fully understands your activities. This ensures your IT system will always be in accordance with your business procedures.

**Request: Sales and Distribution Services**

We are looking for distributors in ICT industry, focusing on the sales of our software development services. Our primary goal is to appear on foreign markets with limited number of distributors, having strategic cooperation agreement among our companies.

**SOLUTION OR EXPERTISE SOUGHT**

We are looking for those active distributors, who may want to extend their portfolio with custom software development services, having clientele with interests in development projects. We can provide you with technical consultancy on your specific projects which enhances your sales-force in the aforementioned area.
