

# SLOVENIAN BRITISH DEFENCE DAY

## 21 - 22 MAY 2024

Total IA Ltd trading as TIA Group are an Electro-Mechanical Engineering business working in the Defence and Government sector. Located in Cheltenham, we offer an end-to-end solution for our customers. We perform design, development and manufacture of specialist products including our own portfolio and modification of OEM equipment to suit requirements. We are specialists in rugged, EMC & TEMPEST and use our engineering capabilities to add value through innovative implementation of those skills, including the supply and integration of UAV and specialist payloads.

Discover QUICKBLOCK: pioneers of sustainable construction blocks made from 100% recycled plastic. Our versatile blocks offer blast and ballistic resistance when filled with local fill materials, perfect for rapidly deployed protective structures. Unfilled, they serve as temporary infrastructure for various needs like dividing walls and modular training environments. Join us in building a sustainable future with QUICKBLOCK's eco-conscious innovation.

LiveLink Aerospace is a privately owned British company on the United Kingdom's south coast. Our team of experts possess a diverse skill set, ranging from electronic and electrical engineering, specialist system manufacturing, high-speed onboard AI, UAV airframe design and testing, scalable, low-cost edge computing capabilities, algorithm design, and cross-domain consultancy. We specialise in developing cutting-edge systems tailored to the evolving demands of the aviation industry. These include our Air Intelligence System (AIS), an innovative and highly advanced air surveillance tool that provides exceptional solutions for securing airspace, and our 'optionally manned aircraft', which offers long-loiter, high-payload ISR mission capabilities while supporting next-gen interception. Our AIS has been extensively used in challenging offshore environments and rigorously tested by NATO in Canada. This state-of-the-art system incorporates advanced Passive Radio (RF) systems and optical and acoustic sensors that work in concert with their SAPIENT-compliant Command and Control (C2) system, Zeus Control. Clients include the Ministry of Defence (MOD), the Civil Aviation Authority (CAA), and several international agencies. Additionally, LiveLink Aerospace is set to expand its services to the British Royal Navy in 2024. LiveLink Aerospace is dedicated to offering top-of-the-line technology solutions that are both reliable and secure. Our AIS system is designed with bespoke firmware, cutting-edge software control systems, and purpose-built hardware to provide cost-effective and highly scalable solutions at all levels. Our mission is to deliver innovative technology solutions that enable our customers to protect restricted airspace with confidence and peace of mind while keeping up with the ever-changing threat landscape.
